

• Drawing made by the investigator.

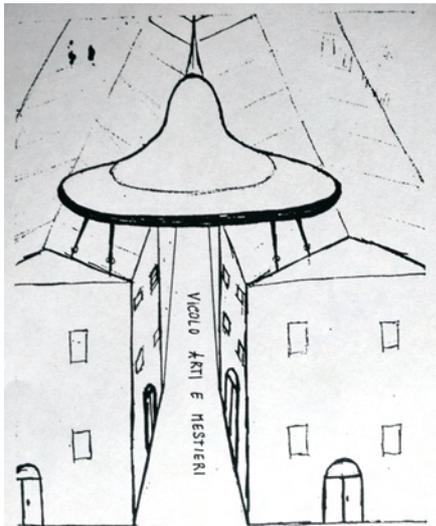

10-12 meters in width. The witness was 50 or 60 meters from the object when he saw two beings who appeared to be making repairs on it. They resembled "normal" men and wore no helmets. Both wore what looked like aviator's overalls. The witness thought that they were pilots of an experimental aircraft belonging to the Allies or the Germans. Because of this, the witness returned slowly to the woods and resumed his work there. Meanwhile, the hissing sound ceased.

○ report by SHADO UFO group

- In 2000, a man approached the members of a local UFO Group during a show devoted to occult subjects. One attendee claimed that he spoke to the witness in the past, prior to his death, but likely many, many years after the event. All available information originated from this one second-hand source.

FOLIGNO (Perugia) - A certain "B." (age 19) was returning home when he saw a hat-shaped object hovering over his own house and then landing on the roof with 4 "telescopic legs." In the bell-shaped upper part of the object, a "door" opened and a kind of "dwarf" appeared, seemingly making some gestures towards the young man. The man went into the house to call his wife, and when he came outside the object was taking off.

• A sketch probably made by the UFO enthusiast who reported the case.

P Paese Sera 13/8/1977

○ report by M.Cestellini

- The vague data on this case emerged about 30 years after its occurrence. As with several other cases dating back to the "pre-1947 era" (not to mention some of the late '40s and early '50s), it seems quite strange that the witness waited so much time before talking about such a fantastic experience, despite the fact that "flying saucer" stories were already popular in the media for some decades and, consequently, the witness could have very well had an opportunity to remember the case and to talk about it.

BORDANO (Udine) - On a late-summer day, 12-year-old boy Armando Picco was upstairs in his home watching lightning strikes outside. Just as the rain ended, he heard a very piercing hissing noise seemingly originating from above. At first very faint, the hissing became so loud that the boy had to cover his ears with his hands. Soon the hissing sound grew fainter and disappeared. Looking up, the boy saw a transparent object hovering over the roof of a house nearby, about 50 meters away. There was a "little man" inside the
